

Dental Hygienists Matter

Protect standards of care in preventive dentistry. Learn what Virginia's proposed "Route B" workforce bills would change—and how to take action.

WHY THIS MATTERS

- SB 178 / HB 970 are described as "Route B" workforce expansion.
- They create/expand a "preventive dental assistant" role authorized for limited scaling/polishing (often framed as "above-the-gumline" cleanings) under supervision.
- Concerns include incomplete care, patient confusion, and inconsistent training/competency verification.

Patients deserve clarity.

If roles expand, people must know who provided care, what was done, and what follow-up is recommended.
